About Me

Motivated and passionate student pursuing studies in Artificial Intelligence and Software Engineering at Turing College. Skilled in Python, JavaScript, and front-end development, with a strong interest in building intelligent, user-focused digital solutions. I am a versatile collaborator comfortable working in freelance, remote, hybrid, or relocation arrangements to contribute to innovative software projects.

Technical Skills

- Programming Languages: Python, JavaScript (ES6+), HTML5, CSS3
- AI & Machine Learning: LangGraph, LangChain, RAG (Retrieval-Augmented Generation), FAISS Vector Stores, OpenAI API Integration, AI Fundamentals
- Tools & Frameworks: Streamlit, Git, GitHub, VS Code, SQLite
- Soft Skills: Technical Communication, Teamwork, Problem-solving, Time Management

Education

Certificate in Software Engineering with JavaScript

Refactory Academy 2025

- Focus areas: JavaScript, web development, problem-solving, and AI fundamentals.
- Engaged in collaborative coding projects and practical assignments.

Certificate in AI & Software Engineering

Turing College 2025-2026

- Gained practical skills in Python, AI tools, and modern software engineering practices

Certificate in Soft Skills

BrighterMonday

- Soft Skills : Communication, Teamwork, Problem-solving, Time Management

Technical Projects &Experience

Lead Developer | Analyst AI — Evidence-Driven Research Agent

- Engineered a research assistant using Python, LangGraph, and LangChain to analyze complex documents and perform live web searches.
- Implemented Agentic RAG with FAISS vector stores for semantic search and Tavily API for real-time data retrieval.
- Developed a multi-user interface with SQLite persistence for managing citations and generating professional reports.

Developer | AI Career Consultant Bot

- Built an advanced RAG-powered guidance tool featuring query translation and specialized tools for salary analysis and skills gap assessment.
- Integrated an MCP Server for professional tool connectivity and implemented real-time analytics for usage and cost tracking.

Developer | AI Interview Practice Assistant Pro

- Developed an interactive interview tool using GPT-4o and Streamlit that provides real-time behavioral and technical feedback.
- Applied advanced Prompt Engineering (Chain-of-Thought, Few-Shot) to simulate various interviewer personas and difficulty levels.

Full-Stack Developer | Mayondo Wood & Furniture Website Management System

- Designed and deployed a comprehensive management dashboard for furniture business operations.
- Developed features for real-time KPI tracking, including revenue, gross profit, and capital in stock.
- Created interactive modules for stock management, supplier sourcing, and staff management to streamline business workflows.
